

Established in 2003 JSC Installations are registered electrical contractors and renewable energy specialists.

From humble beginnings as electrical contractors, JSC Installations has developed to meet the demands of the growing renewable energy sector and offer a wide selection of renewable technologies including:

- Solar photovoltaic (PV)
- Solar Thermal
- Heat pumps
- Wind turbines
- Voltage optimisation

Whatever your energy demands JSC Installations has a solution, want to lower your electricity

bills? solar pv panels or a wind turbine could be the solution, and with a generous feed-in tariff for solar pv panels they could turn out to be more cost effective than you imagined. You could even reduce the amount of power used by installing a voltage optimisation unit.

Want to reduce the ammount of gas you use for heating? Solar thermal panels could be the solution and with the Renewable Heat Incentive (RHI) coming into effect this year you may be eligible for "green" government cashback for every unit of energy you generate.

We pride ourselves in providing a first rate service at affordable prices, we can offer a complete installation solution for the domestic and commercial customer, Our services can help integrate your lifestyle or buisness with your home or premissis.

We listen carefully to our clients before proposing a range of options from which you may choose the most appropriate solution for your needs now, and for the future.

Our services include:

- MCS Solar Photovoltaic (pv) Systems
- Solar Thermal

- Energy Efficiency Solutions
- Smart Home Technologies
- Ground source heat pumps
- Air source heat pumps
- Wind turbines
- Voltage Power Optimisation (VPO)
- Electrical installations / Re-wires
- Electrical Test and Inspection
- All other general installations

Many of our customers come to us on recommendation.

All our work is carried out in compliance with current regulations and all electrical work is signed off by a qualified "Part P" registered Electrician, JSC Instalations is registered with Elecsa part of the Electrical Contractors Association, for more information on Elecsa please visit: <http://www.elecsa.co.uk/householder.aspx>

JSC Instalations have MCS status for solar PV, and are currently working towards obtaining MCS status for solar thermal.
